RE: Review of the April 28, 2014 Forest Stand Delineation Plan (FSD), Aris T. Allen Blvd.

Mr. Mellits;

Department of Neighborhood and Environmental Programs comments regarding the Forest Stand Delineation for the Aris T. Allen Blvd. proposed development:

1. At least four on site Forest Sampling Data points are required for the 13.04 acres that the FSD applies to. FSD-P4 is outside of the FSD area. Therefore please add one Forest Sampling Data point in the interior of the forest.
2. Normally all the information discussed in step 3 c of the *Manual* on pages 2-21 and 2-22 would need to be included in the Natural Resources Inventory & Forest Stand Delineation Report. The focus would be in particular on answering the various questions. For this project please include all this information with the grading permit. Please focus on trees adjacent to the LOD.
3. Based on a recent site visit it appears that the intermittent stream extends to tree T-66. Please adjust the FSD accordingly or provide information to the contrary.
4. Field investigation suggests that a possible wetland may be located directly to the east of lot 48 near a PVC pipe coming out of the ground. Please investigate and adjust the FSD accordingly or provide information to the contrary.

If you have any questions please contact me.

Sincerely,

Frank Biba, AICP, LEED AP
